## New On-Line Media Library Big Marketing Plus For Corrugated Container Corp:

With decades of experience in creating custom packaging and point-of-purchase displays, Corrugated Container Corporation was brimming over with ideas – literally.

Now, thousands of past projects will be incorporated into a web-enabled library system that permits marketing reps in multiple states to access a single application to display and select concepts or past projects for their customers to view and evaluate.

SiteVision was selected to create the application for their experience in back-end corporate applications and digital asset management systems. A custom SiteVision hosting solution supports the application's functionality.

The marketing staff can go online to access the library system, search by such criteria as media type, keyword, title and/or description and create “mini” galleries of specific examples that best meet their customer's needs. If they wish, users can then send a customer link by email to display a secure page for viewing. The

application also includes the ability to track and manage client or related internal emails, and provides immediate access to catalog sell and specification sheets, presentations, and videos, etc.

Peggy M. Underwood, Graphic Design Manager for CCC said, "SiteVision has been a great company to work with, because they understood what we needed. They were able to take our concept of a disk-based portfolio and make it into an easy-to-use and maintain custom on-line media manager for our sales reps . . ."

## Maintenance Announcement:

On **Tuesday, March 16th**, SiteVision, Inc. will be performing scheduled maintenance on all servers providing "shared" services (mail, shared web hosting, FTP, web stats, etc.). This maintenance will include installing important security updates for both the Operating System and installed server application software. Please notify SiteVision if you experience any decreased performance or other issues after the maintenance has been completed.

## Mail Administration Tutorials:

We have developed tutorials for using the Mail Administration web-based tool. This tool is available to the mail administrator(s) assigned to a particular domain's email system. The tutorial provides complete information regarding features that include:

- . **Creating and deleting users.**
- . **Changing passwords.**
- . **How to redirect email to another mail box.**
- . **How to setup forwarding**
- . **How to setup an auto respond email**
- . **Set up a rule to allow, reject, or delete messages.**

You can view these tutorials by following this link:
